of Transportation
**Federal Aviation
Administration**

800 Independence Ave., SW.
Washington, DC 20591

JUN 24 2011

Mr. Sebastien Heintz, President
Zenith Aircraft Company
PO Box 650
Mexico, MO 65265

Dear Mr. Heintz:

The Federal Aviation Administration (FAA) has completed an evaluation of the "CH650B" amateur-built aircraft kit. The Team has determined that the kit, as evaluated at your facility on May 24-25, 2011, may allow an amateur builder to meet the major portion requirement of Title 14, Code of Federal Regulations part 21, Certification Procedures for Products, Articles and Parts, § 21.191(g).

The kit is defined by the CH650B Drawings: Edition 2, Dated 8/9/2010, and Airframe Packing List 8/9/2010, and Finishing Packing List, dated 8/9/2010.

The Production and Airworthiness Division (AIR-200) will have the kit added to the List of Amateur-Built Aircraft Kits located on the FAA website. This evaluation does not mean that the "CH650B" aircraft or kit, is FAA "*Certified*," "*Certificated*," or "*Approved*," and it is inappropriate to represent either as such.

Zenith Aircraft should notify this office in writing if ownership of the company changes and/or if there are changes made to the evaluated kit. Failure to notify this office may result in removal of the kit from the List of Amateur-Built Aircraft Kits.

If you have any questions, please contact the Evaluations and Special Projects Branch, AIR-240, at (202) 385-6346.

Sincerely,

Terry A. Allen
Acting Manager, Production and Airworthiness
Division
